Agency CMBS - Multifamily and Healthcare

In 1934, the National Housing Act established federal insurance programs to support multifamily housing. Annual issuance is between \$10 and \$15 billion.

Economic Benefits

- Stable hedged return profile prepay protection based on contractual lock out and prepayment penalties
- Stable cashflows offer comparable returns to Agency Pass-Throughs (RMBS)

Funding Overview

- Chimera commits funds to an FHA/GNMA approved project
- Construction draw schedules are typically 12 to 24 months
- At the commitment date, Chimera locks in a fixed coupon and spread
- As draws are funded, Chimera receives GNMA bonds (CLC)
- When all draws are funded GNMA issues a Permanent Loan bond (PLC)
- These securities are attractive collateral for future securitizations

Hedging

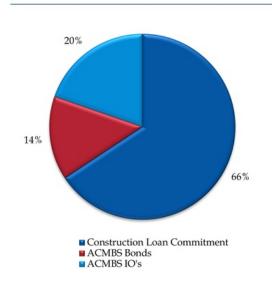

- A hedging portfolio is established to mitigate interest rate risk
- Hedges and related costs are incurred at the commitment date, while interest income doesn't begin until loans are funded resulting in negative carry during initial funding period
- Interest only bonds are added to the portfolio to mitigate this cost

52% of CIM's Non-Agency Portfolio is Re-REMIC Bonds

The Re-Securitization Process

CIM buys \$100mm Non-Agency mortgage bond from dealer

CIM deposits the bond into a trust

The trust issues bonds backed by the cashflow of the underlying bond

CIM sells the Senior A note The A note receives P&I from the \$100mm bond until the \$60mm is paid off

CIM retains the Subordinate B note
The B note receives interest, all losses from the
\$100mm bond and starts to receive principal only
after the Senior A note is paid off in full

Information is unaudited, estimated and subject to change.

The average yield on consolidated retained Subordinate Bonds is over 17%

• Re-Remic subordinates have had slow prepayments considering the low interest rate environment
