FOR IMMEDIATE RELEASE

CHIMERA INVESTMENT CORPORATION RELEASES 2ND QUARTER 2017 EARNINGS

- GAAP EARNINGS OF \$0.56 PER COMMON SHARE
- CORE EARNINGS⁽¹⁾ OF \$0.60 PER COMMON SHARE
- GAAP BOOK VALUE OF \$16.54 PER COMMON SHARE
- ADDED \$1 BILLION OF RESIDENTIAL MORTGAGE LOANS

NEW YORK - (BUSINESS WIRE) - Chimera Investment Corporation, Inc. (NYSE:CIM) today announced its financial results for the second quarter ended June 30, 2017. The Company's second quarter 2017 GAAP net income was \$105.6 million or \$0.56 per common share. Core earnings⁽¹⁾ for the second quarter of 2017 was \$112.1 million or \$0.60 per common share. Economic return on book value for the quarter was 5.2%⁽²⁾. This quarter the Company purchased approximately \$377 million in loans and committed to purchase an additional \$620 million which will bring loan purchases for the year to \$5.1 billion. The Company sponsored one mortgage loan securitization for \$377 million and incurred \$1.3 million in securitization deal related expenses.

“Chimera remains prudent in growing its portfolio, investing an additional \$1 billion in residential mortgage loans” said Matthew Lambiase, Chimera’s CEO and President. “Chimera is focused on producing stable earnings and dividends while protecting book value.”

(1) Core earnings is a non-GAAP measure. See additional discussion on page 5.

(2) Economic return on book value is based on the change in GAAP book value per common share for the quarter plus the quarterly dividend declared per common share.

Note: All per common share amounts presented on a diluted basis.

Other Information

Chimera Investment Corporation is a publicly traded real estate investment trust, or REIT, that is primarily engaged in real estate finance. We were incorporated in Maryland on June 01, 2007 and commenced operations on November 21, 2007. We invest, either directly or indirectly through our subsidiaries, in RMBS, residential mortgage loans, Agency CMBS, commercial mortgage loans, real estate-related securities and various other asset classes. We have elected and believe that we are organized and have operated in a manner that enables us to be taxed as a REIT under the Internal Revenue Code of 1986, as amended, or the Code.

Core earnings

Core earnings is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains on the aggregate portfolio, impairment losses, realized gains on sales of investments, realized gains or losses on futures, realized gains or losses on swap terminations, gain on deconsolidation, extinguishment of debt and certain other non-recurring gains or losses. As defined, core earnings include interest income and expense as well as realized losses on interest rate swaps used to hedge interest rate risk. Management believes that the presentation of core earnings is useful to investors because it can provide a useful measure of comparability to our other REIT peers, but has important limitations. We believe core earnings as described above helps evaluate our financial performance without the impact of certain transactions but is of limited usefulness as an analytical tool. Therefore, core earnings should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP.

The following table provides GAAP measures of net income and net income per basic share available to common stockholders for the periods presented and details with respect to reconciling the line items to core earnings and related per average basic common share amounts:

Economic Net Interest Income

Our “Economic net interest income” is a non-GAAP financial measure, that equals interest income, less interest expense and realized losses on our interest rate swaps. Realized losses on our interest rate swaps are the periodic net settlement payments made or received. For the purpose of computing economic net interest income and ratios relating to cost of funds measures throughout this section, interest expense includes net payments on our interest rate swaps, which is presented as a part of Realized gains (losses) on derivatives in our Consolidated Statements of Operations and Comprehensive Income. Interest rate swaps are used to manage the increase in interest paid on repurchase agreements in a rising rate environment. Presenting the net contractual interest payments on interest rate swaps with the interest paid on interest-bearing liabilities reflects our total contractual interest payments. We believe this presentation is useful to investors because it depicts the economic value of our investment strategy by showing actual interest expense and net interest income. Where indicated, interest expense, including interest payments on interest rate swaps, is referred to as economic interest expense. Where indicated, net interest income reflecting interest payments on interest rate swaps, is referred to as economic net interest income.

The following table reconciles the GAAP and non-GAAP measurements reflected in the Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The table below shows our Net Income, Economic Net Interest Income and Core Earnings, each as a percentage of average equity. Return on average equity is defined as our GAAP net income (loss) as a percentage of average equity. Average equity is defined as the average of Company's beginning and ending equity balance for the period reported. Economic Net Interest Income is a non-GAAP financial measure, that equals interest income, less interest expense and realized losses on our interest rate swaps. Core Earnings is a non-GAAP measure as defined in previous section.
