**FOR IMMEDIATE RELEASE**

**CHIMERA INVESTMENT CORPORATION REPORTS 3RD QUARTER 2019 EARNINGS**

- 3<sup>RD</sup> QUARTER GAAP NET INCOME OF \$0.47 PER COMMON SHARE
- 3<sup>RD</sup> QUARTER CORE EARNINGS<sup>(1)</sup> OF \$0.50 PER COMMON SHARE
- GAAP BOOK VALUE OF \$16.38 PER COMMON SHARE

NEW YORK - (BUSINESS WIRE) - Chimera Investment Corporation (NYSE:CIM) today announced its financial results for the third quarter ended September 30, 2019. The Company's GAAP net income for the third quarter was \$88 million or \$0.47 per common share. Core earnings<sup>(1)</sup> for the third quarter ended September 30, 2019 was \$94 million or \$0.50 per common share. Economic return on book value for the third quarter was 3.9%<sup>(2)</sup>.

"During the third quarter, we sponsored three loan securitizations and purchased \$1.1 billion in loans for our investment portfolio," said Matthew Lambiase, Chimera's CEO and President. "Chimera continues to deliver solid performance for our shareholders with total economic return of 12.5% for the first nine months of 2019."

(1) Core earnings is a non-GAAP measure. See additional discussion on page 5.

(2) Economic return on book value is based on the change in GAAP book value per common share plus the dividend declared per common share.

## Core earnings

Core earnings is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains on the aggregate portfolio, impairment losses, realized gains on sales of investments, realized gains or losses on futures, realized gains or losses on swap terminations, gain on deconsolidation, extinguishment of debt and expenses incurred in relation to securitizations. In addition, stock compensation expense charges incurred on awards to retirement eligible employees is reflected as an expense over a vesting period (36 months) rather than reported as an immediate expense.

As defined, core earnings include interest income and expense as well as periodic cash settlements on interest rate swaps used to hedge interest rate risk and other expenses. Core earnings is inclusive of preferred dividend charges, compensation and benefits (adjusted for awards to retirement eligible employees), general and administrative expenses, servicing fees, as well as income tax expenses incurred during the period. Management believes that the presentation of core earnings provides investors with a useful measure, but has important limitations. We believe core earnings as described above helps us evaluate our financial performance period over period without the impact of certain transactions but is of limited usefulness as an analytical tool. Therefore, core earnings should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP. In addition, our methodology for calculating core earnings may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and accordingly, our reported core earnings may not be comparable to the core earnings reported by other REITs.

The following table provides GAAP measures of net income and net income per basic share available to common stockholders for the periods presented and details with respect to reconciling the line items to core earnings and related per average basic common share amounts. Certain prior period amounts have been reclassified to conform to the current period's presentation.

### *Economic Net Interest Income*

Our “Economic net interest income” is a non-GAAP financial measure, that equals interest income, less interest expense and realized losses on our interest rate swaps. Realized losses on our interest rate swaps are the periodic net settlement payments made or received. For the purpose of computing economic net interest income and ratios relating to cost of funds measures throughout this section, interest expense includes net payments on our interest rate swaps, which is presented as a part of Realized gains (losses) on derivatives in our Consolidated Statements of Operations and Comprehensive Income. Interest rate swaps are used to manage the increase in interest paid on repurchase agreements in a rising rate environment. Presenting the net contractual interest payments on interest rate swaps with the interest paid on interest-bearing liabilities reflects our total contractual interest payments. We believe this presentation is useful to investors because it depicts the economic value of our investment strategy by showing actual interest expense and net interest income. Where indicated, interest expense, including interest payments on interest rate swaps, is referred to as economic interest expense. Where indicated, net interest income reflecting interest payments on interest rate swaps, is referred to as economic net interest income.

The following table reconciles the GAAP and non-GAAP measurements reflected in the Management’s Discussion and Analysis of Financial Condition and Results of Operations.

The table below shows our Net Income and Economic Net Interest Income as a percentage of average stockholders' equity and Core Earnings as a percentage of average common stockholders' equity. Return on average equity is defined as our GAAP net income (loss) as a percentage of average equity. Average equity is defined as the average of our beginning and ending stockholders' equity balance for the period reported. Economic Net Interest Income and Core Earnings are non-GAAP measures as defined in previous sections.
